

Real Estate Lead Generation System

Google Ads Funnel Case Study

Abstract

This case study presents a full-funnel Google Ads strategy designed to generate high-quality real estate leads and convert them into site visits and property sales. The approach focuses on identifying bottlenecks in lead quality and conversion, implementing a structured funnel, and improving overall business outcomes.

Introduction

Real estate marketing faces major challenges including trust issues, low-quality leads, and poor conversion rates. Many campaigns generate leads but fail to convert them into actual site visits or sales.

This case study focuses on building a structured system to improve both lead quality and conversion using Google Ads.

Target Audience

- Age: 28–45
- Profession: IT employees, business owners
- Income: 5L – 20L/year
- Location: Tier 1 and Tier 2 cities
- Pain Points:
 - Fear of scams
 - Legal verification issues
 - ROI confusion

Problems Identified

- High leads but low conversion to site visits
- Lack of trust in real estate offers
- High number of unqualified leads
- Weak follow-up system

Key Bottleneck

The major bottleneck identified was low conversion from leads to site visits.

Strategy Overview

A full-funnel Google Ads system was implemented:

- YouTube Ads for awareness and trust building
- Search Ads to capture high-intent users
- Display Ads for retargeting
- Landing page for lead generation
- Structured follow-up and sales process

Funnel Breakdown

6.1 Awareness (YouTube Ads)

Client testimonials, site walkthrough videos, and market growth insights were used to build trust before asking for action.

6.2 Intent Capture (Search Ads)

Targeted high-intent keywords such as:

- plots for sale in [city]
- buy land near me
- DTCP approved plots

6.3 Lead Generation

Offer included:

- Free legal verification
- Free site visit
- ROI-based suggestions

Landing page focused on clarity, trust, and minimal form friction.

6.4 Retargeting (Display Ads)

Users who interacted with ads or visited the website were retargeted using urgency-driven creatives.

6.5 Sales Conversion

Focused on driving site visits and creating urgency using limited availability messaging.

Lead Qualification System

- Purpose: Investment or construction
- Budget: 10L+
- Timeline: Immediate or 1–3 months

This helped filter out low-intent leads and improve overall conversion quality.

Follow-Up System

- Call within 5 minutes of lead generation
- WhatsApp confirmation before call
- Structured follow-up (Day 1–5)

Sales Process

- Understand buyer goals
- Show limited, high-value options
- Highlight future ROI
- Close with urgency

Performance Projection

Metric	Value
Ad Budget	30,000
Cost Per Lead	400–600
Total Leads	60–80
Site Visits	20–30
Customers	6–10

Key Outcomes

- Reduced junk leads
- Improved lead-to-visit conversion
- Increased trust through multi-touch funnel

Key Learnings

- Ads do not generate revenue, systems do
- Lead quality matters more than quantity
- Follow-up speed directly impacts conversions

Conclusion

This case study demonstrates a structured approach to digital marketing by identifying bottlenecks and improving conversion systems. The strategy focuses on generating high-intent leads and converting them into real business outcomes.

Skills Demonstrated

- Google Ads Strategy
- Funnel Design
- Lead Qualification
- Conversion Optimization
- Customer Psychology
